28 tons of steel construction materials were used for the 'upside down house' built by an entrepreneur in the capital, by spending the money of a villa.

The 'upside down house' opened to visitors in Çankaya is stunning with its interior and exterior appearance. The house, which was built at a cost of 420 thousand liras as a result of four months of work, is attracting attention. There is approximately 9 tons of steel construction in a normal house, they used 28 tons of steel construction in the upside down house to make it sturdy. Noting that they used a 9-degree slope on one side of the house and 8.6 degrees on the other side. This slope causes short-term dizziness in visitors. The entrepreneur whose opened the museum said "The upside-down house we previously opened in Antalya attracted great attention. Our goal in Ankara is to reach 100 thousand visitors." Ankara's first upside down house was opened in Etimesgut last May. With the upside down house that started to serve in Çankaya, the number of interesting buildings that attract visitors in the Capital has increased to two.

The fact that all the furniture in the house is on the ceiling creates surprise in people from the first entrance. The upside-down house, which is waiting for its guests after passing the necessary security tests, opens its doors to those who want to visit every day of the week between 09:00 and 18:00. The upside-down house, which draws attention with its different concept, gives the feeling that a family is living in it. Both the design of the objects and the situation of the house describe an experience. The upside-down house, which stands out with its different corners that appeal to every audience, includes areas such as the kitchen, living room, children's playroom, bathroom and bedroom. The items fixed to the floor or ceiling using professional equipment amaze those who see them with their different concepts. This interesting house, which exhausts the human brain, offers incredible experiences to its visitors as both a museum and a photography area.
